Managing iPads at Home

Parent Workshop

Thursday 12 September, 7.00-8.30pm in the Drama Room, Foundation Block

To support parents and help them with managing iPads in the home, the College would like to offer a workshop where you can learn some strategies that may make life with the iPad less stressful. We will offer the chance to discuss any issues with staff and other parents in an attempt to offer some advice.

Parents will be informed about how we use the iPad at the College and how this can then be related to how students would be expected to use the iPad at home. We will cover the following:

- how we use the iPad in the classroom with sites such as Schoology,
- the College’s expectation of internet access at home,
- how restrictions on the iPad can be implemented at home,
- managing internet access in the home via various methods,
- parent strategies that work – a sharing session, and
- Q&A session.

Places in the workshop will be limited so as to provide a worthwhile experience for the participants. Students would not be expected to attend but you may bring your own or your son/daughter’s iPad. Please ensure you know the passcode. If we have a high demand for these sessions, we will arrange further opportunities to attend later in the year. Please complete the form below and return to the College via your child’s Home Room satchel by Wednesday 11 September.

Alternatively, you can email your intention to Mr Dilger mdilger@mackillop.tas.edu.au. Please ensure you include the number of people attending.

Mike Dilger
eLearning Co-ordinator

Parent Workshop - Managing iPads at Home - September 12 at 7.00pm-8.30 in the Drama Room, Foundation Block

I, _______________________________ Parent/Guardian of ____________________
